

# Release 1.9

NECs Meeting Bratislava  
29<sup>th</sup> *September* 2022

europass

# Notifications

## What:

Users will be able to receive notifications via e-mail and in-app (on the platform) for all shared links, application deadlines, newly received Digitally Signed Credentials (DSC). They will also have the possibility to opt out for what notifications they want to receive (only for shared links or only via email, etc). They will also be able to see an overview of their notifications on a dedicated Notifications Page. Finally – Notifications are actionable – users will be able to act on notifications (both via email and in-app) – modify (e.g., extend a deadline), delete or simply view the notification.

## Why:

The notifications feature could be linked to several Europass tools (Application Manager, Europass documents, Europass profile) and it will be of huge support to the user. This is a well-known feature commonly used on many platforms.

[www.europass.eu](http://www.europass.eu)

## Notifications

Keep track of your notifications and take action on some of them. You can manage your notifications in your Settings

# Search Interface

## What:

Following the implementation of the ELMv3 data model, there is an opportunity to improve the Courses search interface and realise some efficiency in terms of development. Users will be able to make a search for both Courses and Qualifications with additional filters (e.g., Awarding body, teaching language, mode of learning).

Users will be presented with a better view of the course, qualification page.

## Why:

The aim is to improve the search functionality of courses as well as the learning opportunities and qualifications pages; improve the way end-users perform a search, by providing better search narrowing options.

KEY INFORMATION

About this qualification

AWARDED BY

ABOUT THIS QUALIFICATION...

WHAT WILL YOU LEARN?

WHAT'S NEXT

ADMISSION

The master's programme in Civil Engineering focuses on the study and design of buildings and structures (roads, bridges, hydraulic structures, high-rise and industrial buildings) and aims for the formation of civil engineers who can perform at a high level in an international industrial and social environment.

The programme concentrates on the thorough development of the conception and design capability, with the added objective of a job in research and development. Thus lies in the core curriculum of training a pronounced emphasis on the computational aspects of buildings and infrastructure. By means of elective courses, students can select additional aspects of the field corresponding to the personal aptitude and interests. These elective courses also aim to broaden the training programme.

**Entry requirements**  
See Admission and Application page

Learners will have the ability to identify and utilize advanced mathematical, computational, design and/or experimental skills to solve complex problems in civil and environmental engineering.

**Achievement information**

**Volume of learning**  
60 hours

# Profile Sync

## What:

Users are now able to update all their profiles at once – any section or record can be created or updated simultaneously across all language profiles of the user.

## Why:

Improved user experience, aligned with similar platforms on the market.

You can see the information you provided in your Profile in English here.

# Statistics

## What:

We are now gathering data on users' behaviour on the platform (e.g., find a course, find a job, shared profile, library files)

[www.europass.eu](http://www.europass.eu)

## Why:

To determine the direction of Europass in a data-driven way and to better understand the user audience and usage of the Europass platform, we need to gather more data about how the platform is used.

# Skills Intelligence

## 1) DEMAND FOR OCCUPATION GROUPS

End-users select a European country that they are interested in and see a list of the ten occupation groups that are highest in demand in online job ads for that country. They also receive contextual information on the labour market situation of that country.

[www.europass.eu](http://www.europass.eu)

✓ Country

Occupation

**Browse by country**  
Discover the occupations and occupation groups in the highest demand across the EU.

You're interested in occupations located in ☐ Austria. [Edit](#)

Austria...

**Top 10 occupations** Ordered by highest in demand to lowest [See more info](#)

1. [Software developer](#) ▲

Occupations for software developers include but are not limited to user interface developers, software developers, software architects, software analysts and cloud engineers. In 2021, there were 174567 online job advertisements for software developers in Austria. This represented xx% of the total online job ads in Austria.

2. [System analyst](#) ▼

3. [Typist and word processing operator](#) ▼

4. [Baker, pastry-cook and confectionery maker](#) ▼

5. [Nursing professional](#) ▼

6. [Landscape architect](#) ▼

7. [Manufacturing manager](#) ▲

8. [Electrical engineer](#) ▼

9. [Secondary education teacher](#) ▼

10. [Broadcasting and audiovisual technician](#) ▼

# Skills Intelligence

## 2) INFORMATION ON SKILLS AND COUNTRIES

- End-users select an ESCO occupation and are presented with:
- The 10 skills groups that are most relevant for that occupation (Based on ESCO)
- The list of European countries, ordered by the one in which the corresponding occupation group is highest in demand, to the lowest (Based on Cedefop online job advertisements data)

Business analysts research and understand the strategic position of businesses and companies in relation to their markets and stakeholders. They analyse and present their views on how the company, from many perspectives, can improve its strategic position and internal corporate structure. They assess needs for change, communication methods, technology, IT tools, new standards and certifications.

Top 10 skills	Ordered by highest in demand to lowest	See more info
1. <a href="#">Analysing business operations</a>	↕	
Analysing business operations includes skills such as analyse business objectives, evaluate project plans, and interpret business information.		
2. <a href="#">Analysing financial and economic data</a>	↕	
3. <a href="#">Coordinating activities and others</a>	↕	
4. <a href="#">Advising on business or operational matters</a>	↕	
5. <a href="#">Gathering information from physical or electronic sources</a>	↕
