

# Microcredentials in digital form

Michał Nowakowski - Project Leader Educational Research Institute Bratislava, 5.12.2023

# Microcredentials – pilot of a new solution supporting lifelong learning.

#### **Programme**

European Funds for Social Development

#### **Project implementation dates**

01.10.2023 - 30.09.2026

#### **Monitoring Committee**

Ministry of Development Funds and Regional Policy

#### **Priority**

Priority V - Social innovations

#### Main goal:

To verify the usefulness of microcredentials for developing skills in accordance with the concept of lifelong learning, as well as to develop the process of their awarding and collection.

**Estimated budget:** 

5 700 000€

#### **Result indicators**

Number of tested social innovations

1

Number of institutions or firms or organisations that have tested the microcredentials system

25

Assessment by users of the solution's usefulness (based on the results of the pilot)

over 0\*

<sup>\*</sup> measured using the Net Promoter Score

#### **Product indicators**

Number of standards for designing, describing, awarding and ensuring the reliability of microcredentials

1

Number of recommendations for including microcredentials in practice and policies as a solution supporting lifelong learning

1

Number of microcredentials described during the project

**50** 

### Target groups

The project is primarily targeted to groups active in developing ICT skills

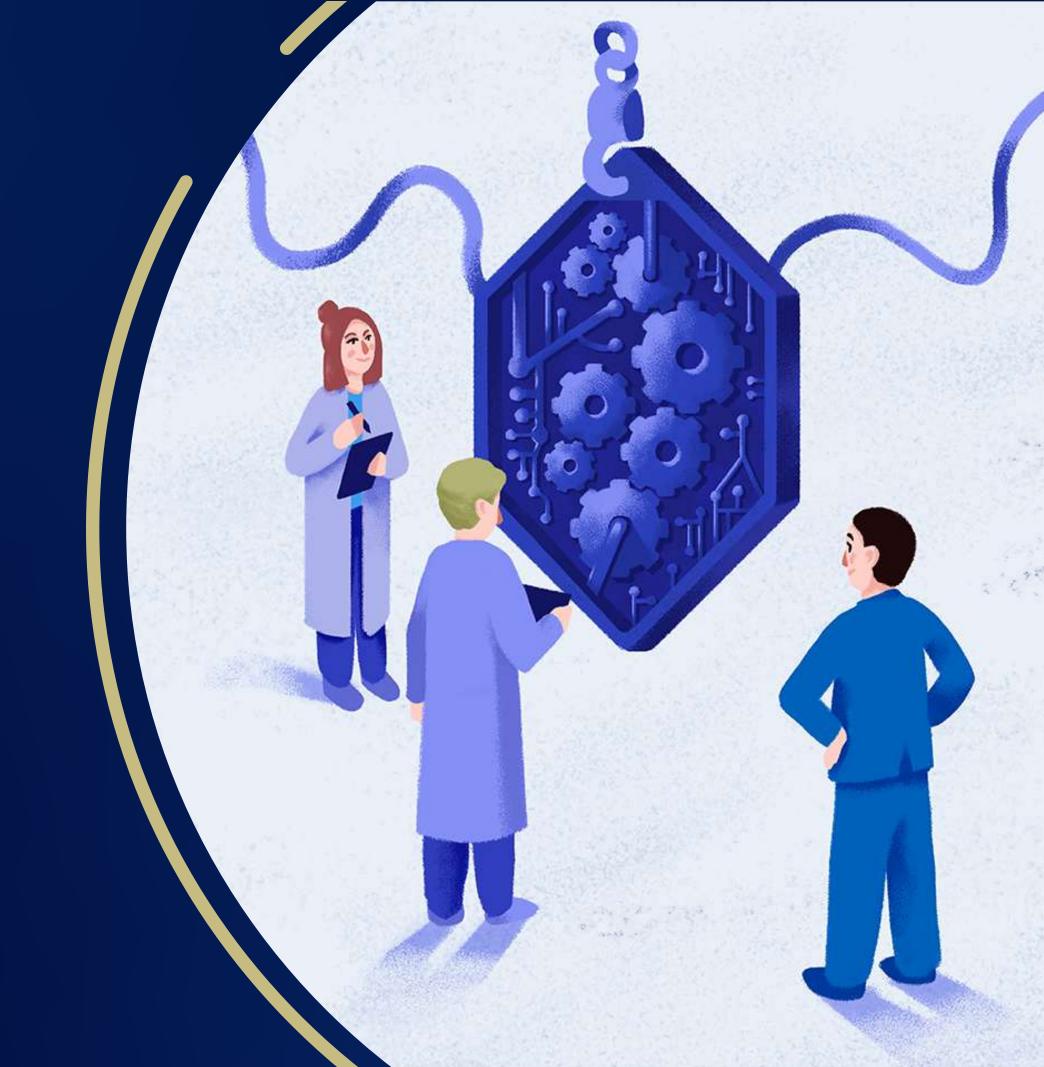

- formal education institutions, especially higher education institutions, which offer adults non-formal education and the ability to verify competences acquired through informal learning
- institutions outside of formal education supporting the lifelong learning of adults, especially:
  - employers seeking workers with specific skills,
  - training firms,
  - recruitment agencies,
  - industry organisations and Sector Skills Councils,
  - employees,
  - young people entering the labour market, e.g., students in their last year of studies, interns

### Task 1

Developing standards and solutions for designing, describing, awarding and ensuring the reliability of microcredentials.

### Task 2

Pilot implementation of digital microcredentials of skills and achievements.

### Task 3

Enhance the useability and ensured availability of the Odznaka+ application as a tool supporting microcredentials, among others, by taking into account the results of the pilot and conducted User Experience studies.

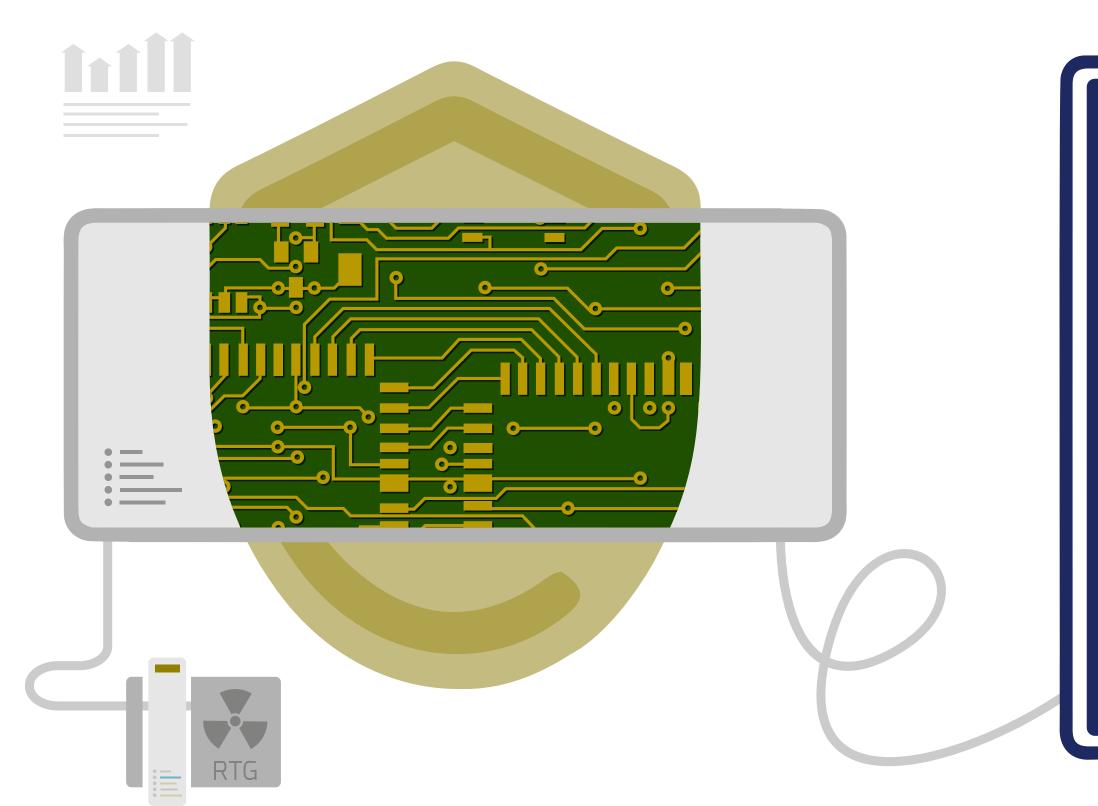

### Task 4

Promote microcredentials in the lifelong learning process and undertake activities to have this solution included in practice and policies.

### What does the Open Badge contain?

- BADGE NAME
- ISSUER (BADGE ISSUER'S DATA)
- EARNER (BADGE EARNER'S DATA)
- BADGE DESCRIPTION
- BADGE GRAPHIC SYMBOL
- BADGE ISSUING CRITERIA
- ISSUE DATE
- TAGS
- EVIDENCE OF MEETING THE CRITERIA
- BADGE EXPIRATION DATE
- BADGE INDIVIDUAL URL

# Infrastructure and ecosystem Open Badges

The Open Badges ecosystem consists of technical elements enabling interaction between specific user groups, which include:

Institutions, schools, higher education institutions or companies that establish badge classes and award badges using the application.

Individuals who can collect Open Badges and store them in an app (such as Odznaka+).

# THE APPLICATION OPERATING THE OPEN BADGES STANDARD

The app enables badges to be issued by publishers and functions as a service allowing the information stored in badges to be read and made available to others.

# The Odznaka+ System

An application enabling digital credentials to be issued, collected over time, stored and shared in the Open Badges standard. The system will be accessible through a website (for all users), as well as in the form of a mobile application for individual users.

### **Our Issuers**

- Higher education institutions
- Secondary schools
- Enterprises
- Event organisers
- Sport organisations
- Associations
